

Hanoi [Roadblock]

Difficulty ★★☆☆

[Roadblock - A Roadblock is a puzzle that only one team member may solve. Teams are advised to choose a team member who enjoys solving logic game puzzles for this Roadblock.

The chosen team member should message any Hunt HQ member on Discord to receive the link to this puzzle.]

After the designated team member messages Hunt HQ to attempt the Roadblock, he/she will be privately sent the link to the Roadblock instructions below:

[Roadblock - A Roadblock is a puzzle that only one team member may solve.]

Trying to get around in a car during the rush hour in Hanoi is a puzzle indeed. The streets are wide, but gridlocked with motorbikes.

What did you learn to avoid to get to the next destination faster?

Only the chosen team member may attempt to solve this puzzle, and you may not obtain assistance from other team members.

This puzzle is a [Sokoban](#) style game that can be accessed [here](#), together with the necessary instructions.

There are a total of 12 streets (stages) to complete.

You are required to complete each street successively but do not need to find the optimal solution for each. You have the option to continue solving from the last unsolved street when you reopen your browser.

After you complete the last street, capture a screenshot of the ending screen of the game with the URL, and send it via message to any Hunt HQ member on Discord to receive the answer to submit for this puzzle.
